Dear Partners and Friends,

On behalf of Professor Bollig, Vice-Rector for Academic Careers, Diversity and International Affairs and Dr. Bildhauer, Head of the International Office, I would like to inform you about the following summer program:

Cologne Summer School on Environmental Studies: Sustainable Cities

From July 13 to July 31, 2015

This summer academy is designed for Bachelor degree seeking students in their last semester and early-stage Master's students from various disciplines, e.g. social sciences, political sciences, law, economics and natural sciences. The course will focus on aspects that draw upon environmental studies from an interdisciplinary perspective.

The lectures, workshops, visits, and excursions will focus on three topics: solid waste management, urban public transport and urban green space.

The language of instruction will be English and up to six ECTS credit points will be granted.

No tuition fees have to be paid by those students who will be nominated by partner universities of the University of Cologne and chosen by the selection committee of the University of Cologne. Only travel costs to Germany, insurance plan and board have to be covered by the participants themselves.

We would be very grateful if you could inform your interested students with the help of the attached information sheet. Please nominate up to three qualified candidates by writing a short nomination letter, which candidates include into their application package. The application deadline is April 1st, 2015.

Please find all necessary information at:

www.colognesummerschools.uni-koeln.de

We would be very glad to receive applications by qualified students of your university and to be their host partner university next summer.

Please do not hesitate to contact me with any questions that may arise.

Sincerely yours,

[Signature]

p.p. Victoria Busch, M. A.
