

Professor Ewa Bulska from the Faculty of Chemistry, University of Warsaw. Since 2013 Director of Biological and Chemical Research Centre, University of Warsaw.

Member of Committee of Analytical Chemistry of Polish Academy of Sciences (KChA PAN) and the Chair of the Analytical Spectrometry Working Group of KChA PAN; member of Polish Chemical Society; member of Board of POLLAB; member of

Executive Committee of EUROLAB.

Field of expertise: atomic and mass spectrometry; non-routine application of spectroscopic techniques, especially for characterisation of biologically active compounds and archaeological objects as well as for trace elements and their speciation. Author or co-author of over 160 publications, few book chapters and several review papers. Author of monography "Metrology in Chemistry", ed. Malamut.

Her achievement was recognised with a number of awards, in between with the prestige Bunsen-Kirchhoff Award, given by German Chemical Society (2004), Wiktor Kemula Award, given by Polish Chemical Society (2012), and recently IUPAC'2015 Distinguished Women in Chemistry Award given by IUPAC (2015).
